*1: These are Menu Waveforms. Many different Waveforms are provided, each one assigned to a different key.

*2: In these Waveforms, a reversed sound is assigned to the upper section on the keyboard. However, on the JD-990, they will instead be sounded in the forward direction, since the instrument does not support reverse playback.

When you create a Patch using the waveforms stored in the Expansion Board, observe the following points:

* If you make a Patch with a single voice and then later play it in a chord, the sound may be distorted with certain settings for the Effects and TVA. If this happens, adjust the level of the Effects and TVA.
